

AMJ Financial Wealth Management Weekly Market Commentary | June 6, 2022

06.06.2022

The Markets

How strong is the United States economy?

That's the question investors were mulling after last week's jobs report.

More jobs were created in May than economists expected, and the labor force participation rate rose, meaning even more people are returning to work. Overall, the unemployment rate remained at 3.6 percent. However, unemployment rates varied by age, sex and race:

- Adult men: 3.4 percent
- Adult women: 3.4 percent
- Asian: 2.4 percent
- Black: 6.2 percent
- Hispanic: 4.3 percent
- White: 3.2 percent
- Teenagers: 10.4 percent

From an inflation perspective, there was some good news in the employment report as earnings increased at a slower pace than in previous months. Apart from that bit of good news, "More jobs added and higher wages are signs of a strong economy...the concern is that inflation will remain close to its recent peak," reported Joel Woelfel and Jacob Sonenshine of *Barron's*.

Some pointed to layoffs at technology companies as a sign the economy might be weakening. However, as Randall Forsyth of *Barron's* reported:

"...16,800 pink slips were handed out last month by 66 technology companies, the most since May 2020 at the depth of the pandemic...Many of those cuts came from outfits with much promise, but no profits, that burned through copious amounts of cash bestowed by a once-ebullient equity market."

Investors who hoped the Fed would ease up were disappointed by the strength of the employment report. The data reinforced expectations that the Federal Reserve will continue to tighten monetary policy, causing the economy to cool down and inflationary forces to recede, reported *Barron's*.

Bond markets appear to agree that the Fed will have to work harder to tame inflation. The U.S. Treasury yield curve moved higher as rates on all maturities of U.S. Treasuries marched higher during

the week. That also suggests recession concerns may be overblown, reported Ben Levisohn of *Barron's*.

Major U.S. stock indices moved lower last week.

Data as of 6/3/22	1-Week	Y-T-D	1-Year	3-Year	5-Year	10-Year
Standard & Poor's 500 Index	-1.2%	-13.8%	-2.0%	14.4%	11.0%	12.4%
Dow Jones Global ex-U.S. Index	0.4	-13.0	-15.9	3.8	1.7	4.3
10-year Treasury Note (yield only)	3.0	N/A	1.6	2.1	2.2	1.5
Gold (per ounce)	-0.4	1.4	-1.2	11.9	7.6	1.2
Bloomberg Commodity Index	0.0	34.9	43.5	20.0	10.3	0.5

S&P 500, Dow Jones Global ex-US, Gold, Bloomberg Commodity Index returns exclude reinvested dividends (gold does not pay a dividend) and the three-, five-, and 10-year returns are annualized; and the 10-year Treasury Note is simply the yield at the close of the day on each of the historical time periods.

Past performance is no guarantee of future results. Indices are unmanaged and cannot be invested into directly. N/A means not applicable.

WHAT'S WRONG WITH THIS PICTURE? Consumers are feeling more pessimistic than they have in a decade. The University of Michigan Consumer Sentiment Survey shows that sentiment has been sliding lower all year. In May, consumer sentiment was down 10.4 percent from April and 29.6 percent year-over-year. Surveys of Consumers Director Joanne Hsu explained:

“This recent drop [in sentiment] was largely driven by continued negative views on current buying conditions for houses and durables, as well as consumers’ future outlook for the economy, primarily due to concerns over inflation.”

One reason analysts keep an eye on consumer sentiment is that it helps predict what will happen to consumer spending. In theory, when consumers are optimistic, spending should increase and when they are pessimistic, spending should decline.

That’s not what happened this year, though.

Despite high levels of pessimism, inflation-adjusted consumer spending has increased every month in 2022, supported by solid wage gains and abundant savings. Here’s the month-by-month rundown:

- January +1.5 percent from the preceding month
- February +0.1 percent from the preceding month
- March +0.5 percent from the preceding month
- April +0.7 percent from the preceding month

Consumer spending includes everything we buy: furniture, cars, clothing, food, shelter, fuel, healthcare, education – you get the idea. It is the primary driver behind the American economy, comprising about 70 percent of economic growth (as measured by gross domestic product or GDP).

It’s possible that consumers are less pessimistic than the Consumer Sentiment survey suggests. Hsu wrote, “Less than one quarter of consumers expected to be worse off financially a year from now. Looking into the long term, a majority of consumers expected their financial situation to improve over

the next five years; this share is essentially unchanged during 2022. A stable outlook for personal finances may currently support consumer spending.”

So, consumers are pessimistic – and they also seem to be optimistic. It’s an interesting conundrum.

Weekly Focus – Think About It

“The test of a first-rate intelligence is the ability to hold two opposed ideas in mind at the same time and still retain the ability to function.”

—*F. Scott Fitzgerald, author*

- * Government bonds and Treasury Bills are guaranteed by the U.S. government as to the timely payment of principal and interest and, if held to maturity, offer a fixed rate of return and fixed principal value. However, the value of fund shares is not guaranteed and will fluctuate.
- * Corporate bonds are considered higher risk than government bonds but normally offer a higher yield and are subject to market, interest rate and credit risk as well as additional risks based on the quality of issuer coupon rate, price, yield, maturity, and redemption features.
- * The Standard & Poor’s 500 (S&P 500) is an unmanaged group of securities considered to be representative of the stock market in general. You cannot invest directly in this index.
- * All indexes referenced are unmanaged. The volatility of indexes could be materially different from that of a client’s portfolio. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment. You cannot invest directly in an index.
- * The Dow Jones Global ex-U.S. Index covers approximately 95% of the market capitalization of the 45 developed and emerging countries included in the Index.
- * The 10-year Treasury Note represents debt owed by the United States Treasury to the public. Since the U.S. Government is seen as a risk-free borrower, investors use the 10-year Treasury Note as a benchmark for the long-term bond market.
- * Gold represents the 3:00 p.m. (London time) gold price as reported by the London Bullion Market Association and is expressed in U.S. Dollars per fine troy ounce. The source for gold data is Federal Reserve Bank of St. Louis (FRED), <https://fred.stlouisfed.org/series/GOLDPMGBD228NLBM>.
- * The Bloomberg Commodity Index is designed to be a highly liquid and diversified benchmark for the commodity futures market. The Index is composed of futures contracts on 19 physical commodities and was launched on July 14, 1998.
- * The DJ Equity All REIT Total Return Index measures the total return performance of the equity subcategory of the Real Estate Investment Trust (REIT) industry as calculated by Dow Jones.
- * The Dow Jones Industrial Average (DJIA), commonly known as “The Dow,” is an index representing 30 stock of companies maintained and reviewed by the editors of The Wall Street Journal.

- * The NASDAQ Composite is an unmanaged index of securities traded on the NASDAQ system.
- * International investing involves special risks such as currency fluctuation and political instability and may not be suitable for all investors. These risks are often heightened for investments in emerging markets.
- * Yahoo! Finance is the source for any reference to the performance of an index between two specific periods.
- * The risk of loss in trading commodities and futures can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition. The high degree of leverage is often obtainable in commodity trading and can work against you as well as for you. The use of leverage can lead to large losses as well as gains.
